

FOR IMMEDIATE RELEASE

Minedco Launches AI-Powered Facebook Backup Tool That Turns Memories Into Personalized Digital Scrapbooks

Leesburg, VA – September 2025

Minedco Holdings, Inc. is proud to announce the upcoming release of LiveOn: Facebook Backup Utility, a groundbreaking tool that combines social media data with large language model (LLM) intelligence to craft emotionally compelling digital scrapbooks personalized to each user.

Unlike traditional data backups that simply archive posts and images, LiveOn uses a dual-layer AI approach. It visually examines the content of your photos and pairs that with a deep understanding of what you wrote—how you said it, and the emotions behind it. By interpreting both visual and written context, LiveOn crafts a vivid, reflective narrative in your own voice, through visual expression—capturing the essence of your digital legacy.

“LiveOn isn’t just about data, it’s about revealing meaning across time,” said Jeff Horner, Founder of Minedco. “You can learn a lot about someone by reading what they say, how they say it, and the context in which it’s said. We’ve demonstrated that with LiveOn, turning up to 21 years of Facebook posts into a narrative of *you*. It brings your voice and memories together in a way that feels personal, lasting, and profoundly yours.”

Key features of the LiveOn utility include:

- Full Facebook content backup, including posts, images, and captions
- AI-authored scrapbooks reflecting personal narrative and voice
- Custom life chapters and highlights based on your digital behavior

LiveOn will be available in September 2025. Users can learn more by visiting www.minedco.com.
